

## Ease of Navigation

"Autism Cookie sales" page doesn't match the content.

Website enhances confusion

Unfinished Website

Confusing menu buttons

Buttons are clunky and don't flow

Disorganized website

Lack of Home Page

Where do I go?

## Knowledge about foundation

The Help autistic kids need

My child needs specialized ways of learning

Not much information

Lack of knowledge about the foundation

Help for more autistic children

## Resources

Easier access to multiple resources

I am unable to find resources for my child

Look up Autism Resources

Google autism resources

My child needs extra help

## Visual Storytelling

I don't know the meaning of photos in "Photo" page. It seems to need labeling.

I want to know how donations are used through examples.

Gallery page has few examples of programs and the photos and videos are not proper

Background videos(ex.beach) are distracting and make the site slow.

## Search function

More publicity for your offered help

Not on Google unless specifically searched

Not able to be found on google

## Trust Building

I feel lost on where to turn

The Contact message form doesn't look reliable. I wonder if it's sent normally to the organization

## Reach of foundation

Asks other parents for advice

Reach out to friends/family for help
